Beware the Big, bad

No place in space wanted these part-robot, part-insect aliens, so the creepy, crawly Insectoids took off in a swarm of big, buzzing bug ships. Led by their clever queen, Gypsy Moth, the Insectoids are on a mission of intergalactic mayhem and mischief.

#6817 Beta Buzzer

It may be small, but with its Beta ray blaster, the pesky Buzzer packs as big a punch as the big bugs.

#6837 Cosmic Creeper

This creepy little crawler can sniff out an energy orb like a tick after a dog. It can crawl into places that the Planetary Prowler won't even think about.

#6919 Planetary Prowler

This creepy crawler looks like a cheerful cricket, but it is one bad bug. It prowls over unprotected planets picking up energy orbs with its powerful magnet. The prowler rolls smoothly over the roughest rocks using its insect legs, wheels and shock absorbers.

CALL ME ROBOBUG.
I'M PART INSECT AND
PART MACHINE.

Hide energy orbs in
secret compartment.

Super shocks absorb
big bumps for smooth
prowling.

bugs from Space! *All New!*

INSECTOIDS

Their bug-ugly ships are filled with flapping wings, powerful pinchers, stingers, and other creepy features. Amazing magnets grab energy orbs on the fly to keep the Insectoid ships going. Some of these buggy ships glow and buzz like real bugs-so next time a bug bugs you, look before you swat. You might need a super strong Insectoid swatter.

Press the buttons to activate three sounds, and light up the stinger.

Insectoid Queen, Gypsy Moth

Danny Longlegs

As Insectoid queen, Gypsy rules the Insectoids in the 6969 Celestial Stinger. She has one strange habit--flying toward the sun and other bright objects. Gypsy is also a fine musician and likes to jam with the Stinger's sound keys.

Danny is the Insectoids communications expert and commander of the 6977 Arachnoid Star Base (shown on page 12). Danny also loves playing spider soccer. He can launch soccer balls into orbit, with any of the Star Base's six legs.

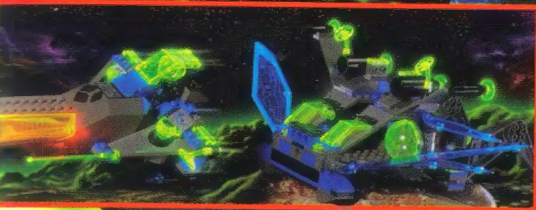

Formula 1 Racer

IT'S TIME TO BUG OUT.

Mighty, mini, mosquito ship.

Detach front stinger ship for quick escapes.

Wings flap for extra bursts of Speed.

Store mosquito ship here, then release magnets to launch.

#6969 Celestial Stinger

The Celestial Stinger is the queen bee of the Insectoid swarm. You'll always know when this big bee buzzes you. It sends out three different buggy sounds, and its stinger glows! The big bee can launch two droid-operated mosquito fighters, and Gypsy Moth can make a quick escape in the front stinger ship.

Gigabot

Gigabot is walking talking robocomputer. His head is filled with a million gigabytes of information. Gigabyte is programmed to pilot every Insectoid ship, but he especially likes to fly 6919 Planetary Prowler. The Prowler's super shocks provide an extra smooth ride.

#6903 Bug Blaster

Look fast! This stealth ship is so sneaky that it can fly around without being seen by humans or even radar.

WATCH OUT!
I'M GNAT FOOLING AROUND!

#6905 Bi-Wing Blaster

The Bi-Wing Blaster is one big bad beetle blaster or two dangerous robobugs. Look out for the bigger bug. It walks, it flies, and it pinches with its powerful pinchers. With its mighty, mini-blasters, the smaller ship detaches to make a pest of itself.

Mini blaster

#6909 Sonic Stinger

This super sonic ship is a real hum-stinger. Loaded with sonic gadgets, including a tail stinger that lights up and makes three noises, this super fast ship really zooms in on target.

Press the buttons to activate three
sounds, and light up the stinger.

MY STING IS WORSE

"The Arachnoid Star Base is the coolest Insectoid ship. I like its light and sounds best. You push a button, and the bug lights up. The ship also makes cool laser noises or sounds like it is blasting off."

"It's fun to load up the Star Base with the two Insectoids and two droids and roll the big bug around. And when you need a little more power, you can just grab an energy orb with the magnetic crane and load it inside the ship."

Find the Maniac and Claim Your Reward!

The Insectoid Queen is after the Maniac for stopping the Insectoid invasion of Earth. To hide from the enraged Insectoid, the Maniac grabbed a bunch of #5600 Radio Control Racer Sets and built all 5 different models: Cheetah Racer, Formula 1 Racer, Dune Buggy, Flatbed Truck, and Jet Car. Then the Maniac went a little out of control and sent decoy R-C Racers all over the magazine to fool the Insectoid Queen. Your mission is to locate all the different R-C Racers hidden in the magazine, and find the real Maniac. And you're off!
